Experience

Associate Product Developer - Epicor Software, Bengaluru Sep 2026 - Present

- Re-tested 5 penetration testing defect tickets with Burp Suite; discovered 3 incomplete fixes (CSP unsafe-inline bypass, BOLA user-data exposure, JWT post-logout invalidation failure) and returned tickets in Jira with PoCs.
- Renewed an application certificate and created a CA certificate for the application, applying certificate lifecycle fundamentals alongside Azure DevOps pipeline and Agile delivery work.

Product Development Intern - Epicor Software, Bengaluru Oct 2025 - Sep 2026

- Engineered a PowerShell cleanup script deployed across 5 agent VMs via a weekly automated ADO pipeline, clearing ~15 GB of logs and temp data per run and eliminating pipeline failures caused by storage exhaustion.
- Developed TypeScript UI automation and authored Python/Locust load testing scripts exercising enterprise application workflows across multiple parallel Chrome instances under concurrent load.

Security Consultant (Freelancer) - Mindpex July - Aug 2026

- Assessed a multi-tenant SaaS platform across 7 security domains using OWASP WSTG, documenting 30+ CVSS-scored findings (14 Critical, 17 High) in 7 audit reports with a prioritized P0-to-backlog remediation roadmap.
- Reviewed perimeter and session security configuration (CSP, security headers, cookie attributes, rate limiting), uncovering a middleware misconfiguration that left all perimeter controls inactive; delivered TypeScript remediation.
- Audited 47 PostgreSQL RLS migrations and audit-logging coverage, identifying two Critical unauthenticated-write misconfigurations and 14+ admin operations with no audit records; delivered SQL and code-level fixes.

Projects

Black-Box Web Pentest - Powerdialer (Github Repository) Jun 2026

- Performed an authorized OWASP WSTG-based assessment validating authentication, authorization, API, and WebSocket controls using Burp Suite, ffuf, and Gobuster.
- Identified BOLA, exposed OAuth client credentials in client-side resources, and CORS misconfiguration; scored with CVSS and supported with attack chains and technical evidence.
- Documented an executive summary, technical findings, and remediation guidance on least privilege, secret management, and secure configuration.

VigiLynx - Winner, HackAthena'25 Cybersecurity Track (Live Web App | Github) Apr - June 2025

- Implemented a Random Forest URL-classification pipeline analyzing 1,000+ URLs and generating real-time browser alerts through a Chrome extension.
- Integrated VirusTotal threat-intelligence APIs to automate malware verdicts across 50+ scanned files and enrich detections.
- Developed an authenticated monitoring dashboard logging phishing detections, scan history, and per-user threat statistics.

Skills

- **Security:** Product Security, Prompt Injection / LLM Security, Secret Management, SAST, API Security, SSRF, Authentication, Authorization
- **Programming:** Python, JavaScript, TypeScript, Powershell, SQL
- **Operating Systems:** Linux, Windows
- **Networking:** Networking Fundamentals (TCP/IP, DNS, HTTP/S)
- **Tools:** Burp Suite, ffuf, Nmap, SSMS, VirusTotal API, JIRA / Azure DevOps, Semgrep

Certifications And Achievements

- CompTIA Security+ (SY0-701) - June 2026
- ISC2 Certified in Cybersecurity (CC) - Feb 2026
- Winner - HackAthena'25 Cybersecurity Track (National Hackathon)
- Solved 200+ CTF Challenges (Cryptography, Web Exploitation, Digital Forensics)
- Top 10% Ranking on TryHackMe

Education

New Horizon College of Engineering, Bengaluru Nov 2022 - July 2026

B.E. in Information Science and Engineering, CGPA: 8.57
