Experience

Associate Product Developer - Epicor Software, Bengaluru Sep 2026 - Present

- Validated remediation of 5 penetration testing defects with Burp Suite and manual API manipulation, uncovering 3 incomplete fixes (CSP unsafe-inline bypass, BOLA user-data exposure, JWT post-logout invalidation failure) and returning tickets in Jira with PoCs.
- Renewed an application certificate and created a CA certificate, managing certificate lifecycle and secure-communication requirements within Azure DevOps and Agile delivery workflows.

Product Development Intern - Epicor Software, Bengaluru Oct 2025 - Sep 2026

- Engineered a PowerShell cleanup script deployed across 5 agent VMs via a weekly automated ADO pipeline, clearing ~ 50 GB of logs and temp data per run and eliminating pipeline failures caused by storage exhaustion.
- Performed log-based root cause analysis on pipeline and script failures across Windows and Linux execution environments, tracing storage exhaustion and network errors to restore reliable automated operations.

Security Consultant (Freelancer) - Mindpex July - Aug 2026

- Assessed a multi-tenant SaaS platform across 7 security domains using OWASP WSTG, documenting 30+ CVSS-scored findings (14 Critical, 17 High) in 7 audit reports with a prioritized P0-to-backlog remediation roadmap.
- Identified account takeover via invitation-flow forced password override and privilege escalation through auto-assigned admin roles; delivered code-level remediation strengthening authentication and least-privilege controls.
- Reviewed perimeter controls (CSP, security headers, cookie attributes, rate limiting) and audit-logging coverage, uncovering inactive perimeter middleware and 14+ admin operations with no audit records; delivered TypeScript and SQL fixes.

Projects

VigiLynx - Winner, HackAthena'25 Cybersecurity Track (Live Web App | Github) Apr - June 2025

- Implemented a Random Forest phishing-detection pipeline using URL feature extraction to analyze 1,000+ URLs and generate real-time browser alerts through a Chrome extension.
- Integrated VirusTotal threat-intelligence APIs to automate malware verdict parsing across 50+ scanned files, improving IOC validation and threat visibility.
- Developed authenticated backend services logging phishing detections, scan history, and per-user security events for monitoring and reporting.

Black-Box Web Pentest - Powerdialer (Github Repository) Jun 2026

- Performed an authorized OWASP WSTG-based assessment validating authentication, authorization, API, and WebSocket controls using Burp Suite, ffuf, and Gobuster.
- Identified BOLA, exposed OAuth client credentials in client-side resources, and CORS misconfiguration; scored findings with CVSS and documented attack chains with technical evidence.
- Authored remediation guidance on least privilege, secret management, and secure configuration to reduce account-compromise risk.

Skills

- **Security:** Account Takeover Risk, Phishing & Malware Detection, Threat Intelligence, Authentication, Authorization, Least Privilege, Secure Configuration, Vulnerability Assessment, Secret Management, Defense in Depth, Log Analysis
- **Programming:** PowerShell, Python, Bash, JavaScript, TypeScript, SQL
- **Operating Systems:** Windows, Linux (Ubuntu, Kali)
- **Networking:** TCP/IP, DNS, HTTP/S
- **Tools:** Burp Suite, Nmap, Wireshark, VirusTotal API, Azure DevOps, Jira, SSMS, Semgrep

Certifications and Achievements

- CompTIA Security+ (SY0-701) - June 2026
- ISC2 Certified in Cybersecurity (CC) - Feb 2026
- Winner - HackAthena'25 Cybersecurity Track (National Hackathon)
- Solved 200+ CTF Challenges | Top 10% Ranking on TryHackMe

Education

New Horizon College of Engineering, Bengaluru Nov 2022 - July 2026

B.E. in Information Science and Engineering, CGPA: 8.57
